General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

Remove to fresh air immediately. If breathing has stopped, perform artificial respiration. If breathing is difficult, have qualified medical personnel administer oxygen, keep person warm and get medical attention.

In case of skin contact

Remove contaminated clothing and wash before reuse. Flush skin with water for 15-20 minutes to remove all chemicals. Get immediate medical attention.

In case of eye contact

Flush eyes immediately with large amounts of water for 15-20 minutes, lifting upper and lower eyelids to remove all chemicals. Get immediate medical attention.

If swallowed

Do not induce vomiting. Get immediate medical attention. Maintain airway and respiration. If vomiting occurs, keep head lower than hips to prevent aspiration.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11
